SAVINGS RESULTING FROM ACCURATE MILEAGE REPORT

15%

MONTHLY TIME SAVINGS

90min

FUEL CONSUMPTION

5%

REPAIR AND MAINTENANCE COST

12%

SPEEDING

23%

VEMOCO's Experience and Expansion:

VEMOCO has been a leader in telematics and field automation since 2014, recently adding a mobile phone-based mileage tracker service tailored for contractors and small businesses.

Mobile-Only Solutions:

The FLEET+ Free and Lite services use GPS data from smartphones, eliminating the need for hardware devices and offering **unlimited route tracking for free**.

Business and Private Use:

Users can classify routes as business or private, and VEMOCO automatically generates **monthly mileage logs to support IRS/CRA-compliant reporting**.

Enhanced Features:

The app includes fuel-saving tips, **speeding alerts**, Points of Interest (POIs) for automated location tracking, and maintenance reminders to help users minimize warranty issues.

Driver Detection via Bluetooth:

The solution uses Bluetooth hands-free device IDs for accurate vehicle tracking and preventing errors from accidental route recording.

Ease of Use:

A user-friendly mobile application incorporates smart intelligence to streamline telematics management.

Benefit examples are based on estimates derived from VEMOCO FLEET+ PRO services and publicly available mobile-based tracking solutions.
